

WHAT IS CLAIMED IS:

1. A cushion fabric generally comprising a first breathable layer,
a filter layer and a second breathable layer, the three layers being
integrally combined together to form the cushion fabric by hot pressing
5 approach, wherein the first breathable layer being pressed against a first
surface of the filter layer, a second surface of the filter layer being
pressed against and combined with the second breathable layer, the first
breathable layer and the second breathable layer being made of non-
woven fabrics, the filter layer containing active carbon.
- 10 2. The cushion fabric as claimed in claim 1, further comprising
an adhesion layer attached to the first breathable layer.
3. The cushion fabric as claimed in claim 1, further comprising
an adhesion layer attached to the second breathable layer.
4. The cushion fabric as claimed in claim 2, wherein the
15 adhesion layer is defined with plural gas holes, each paired neighboring
gas holes are connected by a groove respectively.
5. The cushion fabric as claimed in claim 3, wherein the
adhesion layer is defined with plural gas holes, each paired neighboring
gas holes are connected by a groove respectively.
- 20 6. The cushion fabric as claimed in claim 2, wherein the
adhesion layer is made of foaming material EVA.
7. The cushion fabric as claimed in claim 3, wherein the
adhesion layer is made of foaming material EVA.
